# Strep A-Flip Cassette

Rapid Detection of Group A Streptococcal Antigen  
Directly From Throat Swab Specimens.

Status Strep A-Flip Refer to package insert before performing a test

 <p>The diagram shows a cross-section of the Strep A-Flip cassette. It features an 'Extraction Well' at the top, a 'Swab Stand' in the middle, and an 'Extraction' capsule at the bottom. A 'Result Window' is located on the right side. The cassette is labeled 'Step A' and 'Date'.</p>	<p>1. Twist the tab off the Extraction Capsule. Squeeze the entire contents of the Extraction Reagent Capsule into the extraction well of the test device.</p> <p>specimen flows into the hole.</p> <p>4. Slowly lay the device back down onto flat surface and read results after 5-10 minutes.</p>
